

LIGHT24

20 & 21 NOVEMBER 2024

BUSINESS DESCRIPTION

Saas can mean different things to different clients. At the core we are a family-owned lighting manufacturer from Helsinki, Finland. But our eagerness to see through projects we are involved in has also led us onto the path of lighting consultants.

In practice, this means working closely with architects, interior designers, and end-client to achieve the best possible solution for a specific project. It's a symbiosis that ensures the smoothest way to the completion of a project with the greatest result. A job that guarantees the highest potential in our products if you will.

SAAS PILLARS

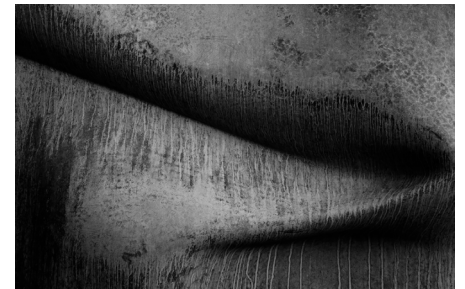

LABORATORY

We create tailor-made lighting solutions to our customers' specific needs. Laboratory means building everything from scratch, or creating a new concept using already existing products.

INSTRUMENTS

We have a selection of high-quality LED components for professional electricians. These Plug n Play solutions are easy to install and compact in size.

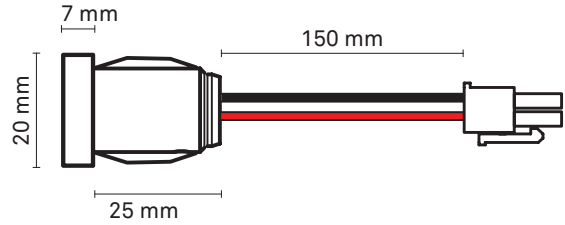

DESIGN

Our collection of design lights sits on the border between art and light. These fixtures have been created for Saas Instruments in collaboration with renowned Nordic designers.
